Technical Remarks

- The min. control pressure must be adhered to, since otherwise faulty switching and valve failure may result!
- The pressure dew point must be at least 15 °C under ambient and medium temperature and may not exceed 3 °C.
- The oil content of compressed air must remain constant during the life cycle.
- Use only the approved oils from AVENTICS, see chapter „Technical information“.
- * Note: ATEX version can be produced by combining the basic valve without coil with a series DO30 CNOMO pilot valve and an ATEX coil.ATEX ID: see ATEX coils catalog page.

1) The pilot can be set by turning the seal under the valve cover by 180°.
2) For internal pilot the working pressure min/max is the same as the control pressure min/max.
3) with throttle
Basic valve without pilot valve
Nominal flow Qn at 6 bar and Δp = 1 bar
