Cylinder accessories ▶ Locking Elements, series CL1

Holding unit HU1

	Holding unit, HU1 ▶ Ø20 - 25 mm ▶ hold: spring force, release: compressed air	3
	Holding unit, HU1 ▶ Ø32 - 100 mm ▶ hold: spring force, release: compressed air	5

Cylinder accessories ► Locking Elements, series CL1

Holding unit, HU1

► Ø20 - 25 mm ► hold: spring force, release: compressed air

00106684

Function	Hold with clamping jaws
release pressure	4 bar / 8 bar
Ambient temperature min./max.	-10°C / +60°C
Medium temperature min./max.	-10°C / +60°C
Max. particle size	5 µm
Oil content of compressed air	0 mg/m³ - 5 mg/m³
Static holding force	See table below
Materials:	
Housing	Aluminum, black anodized

Technical Remarks

- The pressure dew point must be at least 15 °C under ambient and medium temperature and may not exceed 3 °C.
- The oil content of compressed air must remain constant during the life cycle.
- Use only the approved oils from AVENTICS, see chapter „Technical information“.
- Warning: The holding unit may not be used for the following applications:- for dynamic holding- in or as safety equipment
- Holding unit may only be unlocked when turned off.
- Make sure that the load direction does not change during a holding interval. A change in the direction of force, as well as external forces such as impacts, strong vibrations, or torsional forces, will briefly release the piston rod and may destroy the HU1 holding unit.
- When clamped, there must be no residual pressure on the holding unit (0 bar).
- Note: The minimum control pressure is >= the working pressure of the cylinder!
