## Holes, Threaded metric / inch

Rev. date: 2012-04-20

### Internal thread:

Use Drill diam, Major diameter. (Example of M6 hole)

Drill diam. = 5

Thread Length = 16 (AF measure on offer drawing)

Major diameter = 6

### External thread:

Use Minor diameter, Major diameter. (Example of M6 threaded piston)

Minor diameter = 4.917 Major diameter = 6
